Foreword

This publication is one of a monthly series containing data on medical assistance payments made under Title XIX of the Social Security Act (Medicaid). Information is compiled and reported by each State and/or jurisidictional agency administering an approved Title XIX program on Federal Report Form SRS-NCSS-120: Monthly Statistical Report on Medical Care. Currently there are 54 such programs in 49 States, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Arizona has not initiated a Title XIX program and Massachusetts has a separate State agency for blind recipients.

Prior to January 1974, similar data were collected for the midmonth of each quarter and midmonth quarterly reports have been published in this series since May 1967.

Reports for the months of March, June and September will include quarterly summary data and in addition, reports for December will include annual summary data.

Information presented include medical payments by form of payment, payments to medical vendors by type of service, number of recipients in whose behalf medical vendor payments were made, and data related to screening services under the Early and Periodic Screening, Diagnosis and Treatment Program.

This report was prepared by Henrietta Duvall and Annie J. Mayfield, with the assistance of Robert Terrell, National Center for Social Statistics.

Introduction

Medicaid (Title XIX of the Social Security Act) is an assistance program designed to provide medical assistance to specified groups of needy individuals. Such persons are classified into two main groups according to their maintenance assistance status, (1) those who are authorized to receive money payments for their basic necessities under public assistance programs such as Supplemental Security Income and Aid to Families with Dependent Children, and (2) those who are not receiving maintenance assistance payments even though they may, in fact, be eligible. There are extensions of the maintenance assistance status categories but uniform procedures do not exist for reporting such data. There are four basic eligibility requirements for medical assistance: (1) age 65 and over; (2) blindness; (3) permanent and total disability; and (4) membership in families with dependent children. In addition, some States have exercised the option of including other needy persons who do not fall into any of the above categories. Such recipients are classified as 'Other title XIX' recipients in the accompanying tables. Also, 'essential persons' (usually spouses) may also be eligible for medical care. For money payment recipients, these persons are usually classified according to the same eligibility factors as the recipient spouse.

Generally, payments are made out of Medicaid funds to vendors (providers) of medical services, directly or through a fiscal agent as the direct results of claims filed by the provider after services are rendered. Data presented in this publication are generated as an adjunct to the Medicaid claims processing and payment operation. Thus, information is based on bills paid and not services rendered during the month. Consequently, the data provided through this process are not professed to represent a true picture of the incidence of illness among Medicaid eligibles and are subject to fluctuations unrelated to the provision of medical care. Monthly data are collected and presented to meet pressing current demands for minimum information on medical care financed under title XIX. However, States are required to provide more significant and detailed annual data on the numbers of persons receiving medical services, the number of units of such services and the corresponding amounts of payments.

Except for payments, data related to screening services are not necessarily generated through the claims payment process. Numbers of individuals screened are usually based on services actually rendered during the report month. As a result, payments reported for screening services may be unrelated to persons receiving such services.

HIGHLIGHTS

Medical Assistance (Medicaid) Financed Under Title XIX of the Social Security Act - September 1975

Payments made out of Title XIX funds for September totalled $1.163 1/ billion, an increase of $37 million over August. Average monthly payments for the year ending in September equalled $1.107 billion, a 1.4 percent increase over the average for the year ending in August.

During September, 8.85 million recipients 2/ had medical vendor payments totalling $1.122 billion made in their behalf.

There were concurrently 526,022 medicaid eligibles enrolled in health maintenance organizations whose premiums totalling $16 million were paid out of Title XIX funds. Oregon reported HMO data for the first time in September, bringing to a total of 13 States offering medicaid services through such facilities.

Persons Served

The percentage distribution of persons for whom medical payments were made by basis of eligibility and money payment status for September is as follows:

Basis of eligibility	Total	Money Payment Status: Money payment authorized	Money Payment Status: Money payment not authorized
		Percent	
Total	100.0	75.3	24.7
Aged 65 and over	23.3	14.9	8.4
Blindness	0.5	0.4	0.1
Permanently and totally disabled	14.2	11.0	3.2
Children under 21 in families	32.5	28.4	4.1
Adults in families with dependent children	22.3	20.4	1.9
Other Title XIX under 21	3.4	xxx	3.4
Other Title XIX age 21-64	3.8	xxx	3.8

1/ Includes total payments of $2,585,017 for Vermont and vendor payments of $2,540,017.

2/ Includes recipient count of 21,000 for Vermont which was furnished by the State. Recipient estimate for Wyoming was based on average payments per recipient from prior months. North Carolina recipient count was inflated to reflect prescribed drugs.

More than half (54.8 percent) of the recipients for whom vendor payments were made were members of families with dependent children. Children under 21 in families and other Title XIX recipients under 21 accounted for 35.9 percent of recipients. Recipients eligible on the basis of age 65 and over accounted for 23.3 percent of the caseload. Recipients who also received money payments outnumbered nonmoney payment recipients by more than 3 to 1. Among members of families with dependent children under 21, nine out of ten medicaid recipients also received AFDC money payments.

Medical Payments by Groups of Persons Served

As shown below, the distribution of payments differs significantly from the caseload distribution. Payments for persons not receiving maintenance assistance are nearly equal to those for money payment recipients. The single largest proportion of payments (26.3 percent) are made on behalf of recipients aged 65 and older who are not also recipients of maintenance assistance. Such recipients represent only 8.4 percent of the caseload. Payments for these recipients, to a large extent, are made to medical inpatient facilities, which represent the more expensive types of medical services. Only 17.9 percent (about half of the corresponding recipient proportion) of payments are made on behalf of children under 21 years of age. Among the eligibility groups under age 65, the largest proportion of payments (25.3 percent) are made on behalf of the permanently and totally disabled.

Basis of eligibility	Total	Money Payment Status: Money payment authorized	Money Payment Status: Money payment not authorized
		Percent	
Total	100.0	53.6	46.4
Aged 65 and over	36.9	10.6	26.3
Blindness	0.6	0.4	0.2
Permanently and totally disabled	25.3	15.9	9.4
Children under 21 in families	15.0	12.3	2.7
Adults in families with dependent children	16.2	14.2	2.0
Other Title XIX under 21	2.9	xxx	2.9
Other Title XIX age 21-64	3.1	xxx	3.1

Payments by Type of Service

The increase in payments in September was largely due to increased payments for general hospital and intermediate care facility services, however, the increase in payments for those inpatient services were largely offset by a decrease in payments for skilled nursing services. The overall picture continued to reveal a higher average monthly rate of increase in outpatient and other professional services than for inpatient services. The average monthly increase in payments for the year ending in September was greater than two percent for general hospital, outpatient hospital, laboratory and radiological, home health and family planning services. Payments for inpatient services constituted 69.4 percent of the total: hospitals (32.9 percent) skilled nursing facilities (17.2 percent) and intermediate care facilities (19.3 percent). Among other services, payments to physicians' and for prescribed drugs accounted for 9.7 and 6.4 percent of all vendor payments.

Screening Services

During September a total of 170,283 children were reported as screened under the Early and Periodic Screening, Diagnosis and Treatment Program. Fifty-eight percent of the children screened were six years of age and older. About forty-nine percent of children screened had referrable conditions uncovered and ninety-two percent of those with conditions uncovered were referred for diagnosis and/or treatment.

Annotations

1. The following definitions apply to symbols appearing in the detailed tables:

   --- indicates no data reported.
   *** indicates that the percent was not computed because the base was too small.
   Z indicates that the percent was less than 0.05.

2. Arizona has no title XIX program and is excluded from the tabulations. Vermont did not submit a report for September and is excluded from the tabulations.

3. Wyoming did not report recipients or payments by maintenance assistance status and basis of eligibility of recipient and is excluded from all applicable tables. Colorado reported recipients and payments by basis of eligibility only.

4. States do not always report premium or per capita payments into the SSA system for the aged and disabled recipients separately, such as Georgia and Maine where the payments reported under the aged category include payments for the disabled. There is variance from month to month in States reporting HMO and SSA premium payments because in some cases, such payments may be made less frequently than monthly.

5. North Carolina recipients for prescribed drugs and Colorado recipients for dental services are not included in the tabulations. Payments for such services are reflected in Table 5 only.

6. Minnesota and Washington included HMO recipients and premium amounts in the data in Tables 2-14.

7. For New York, recipient and payment data by basis of eligibility and maintenance status were estimated by the State.

8. In addition to Colorado, Vermont, and Wyoming; Massachusetts, Nevada, Pennsylvania, and Utah are excluded from Tables 10-13 because children and adults in families were not reported separately. Connecticut, Illinois, Kansas, Minnesota, and West Virginia were able to report children and adults separately but were unable to differentiate medical vendor payments between adults and children in families. These States are excluded from the total percentage computation in Table 11. Pennsylvania did not differentiate other title XIX recipients by age and is excluded from Table 14.

9. For Utah, all adult recipient i.e., aged 65 and over, blind and disabled are reported under money payment not authorized even though some may be SSI recipients.

10. In some States, two or more types of medical services may be grouped together under one class, such as Connecticut where other practitioners', clinic, laboratory and radiological, home health, and family planning services are included in other care, and general hospital services include mental hospital. In South Carolina, skilled nursing facility services include payments to State mental institutions.

11. For some States, differences in vendor payment amounts between Table 3 and Table 5 are due to inclusion of retroactive adjustments which can be reported by type of service (Table 5) but which are not applicable to the recipients reported in Tables 2,4, and 6-9. For the current month, however, Michigan's expenditures exclude accounting adjustments of $650,141.

Annotations specific for Screening Tables 15-20

12. California reported 97,214 individuals receiving comprehensive physical examinations in addition to the screening data.

13. Data for Massachusetts, Ohio, Indiana, and North Carolina are incomplete. For Rhode Island, data include 101 newborns, for whom payments are reflected in physicians' or hospital services. For Massachusetts, data include services for medicaid newborns, foster children, and mentally retarded children enrolled in the State's special schools.

14. Payments for screening services were not reported by Maryland, Massachusetts, North Dakota, the Virgin Islands and Puerto Rico and payments for Idaho, Illinois, Michigan, New York, Ohio, Pennsylvania, and Texas were not reported separately by age.

QUARTERLY HIGHLIGHTS
JULY-SEPTEMBER 1975

Payments made out of Title XIX funds totalled $3.4 billion during the first quarter of fiscal year 1976. An average monthly number of 8.68 million persons received Medicaid services during the quarter. There occurred the usual seasonal decrease in both payments and recipients over the preceding quarter, however when compared with the same quarter in the previous year, recipients increased by 10.9 percent and payments increased by 20.8 percent. When payment data are deflated by the medical cost price index, the caseload is increasing at a faster rate. Members of families with dependent children comprised 55 percent of the caseload and increases over the same quarter a year ago for both adults and children in families were higher than the increase in total recipients. The subtle changes in caseload composition as well as perceptible changes in services utilized (See Table Q-1, especially home health services) are factors accounting for the more rapid growth in persons served at costs somewhat less than expected under current economic conditions.

Table Q-1.--Amounts of medical vendor payments under Title XIX by type of service from the quarter ended September 1974 to the quarter ended September 1975
(In thousands)

Type of service	July-September 1974	October-December 1974	January-March 1975	April-June 1975	July-September 1975	Percent change from--	
						April-June 1975 July-September 1975	July-September 1974 July-September 1975
